A Warm Highland Home

With another chilly Winter approaching in Aberdeen, Pablo was looking for help on how to make his home as warm and as efficient as possible. With the price of his oil-fired boiler rocketing, and a new baby in the family, it was important he could use someone he could trust. Having worked with Eco Concierge as part of his companies employee engagement programme, he contacted us for support.

A mix of our cosy home concierge and renewables concierge services uncovered a local £2000 interest free loan, an £850 discount on air source heat pumps and over £400 savings on loft insulation. Pablo now has a fully insulated home, and options on an air source heat pump system fully surveyed and costed by the best installer in his area.

If Pablo goes ahead with an Air Source Heat Pump, he may save around 1.6 Tonnes of CO_{2e} per year, generate £20,000 over 20 years and save £6,200 on fuel. Happy Days!

Air Source Heat Pump

Pablo: "To find a reliable renewables company is difficult in Aberdeenshire, the service was key to be able to get good quotes. We can't install the heat pumps immediately, but we did top up the loft at a good price!"

If you're interested in living more sustainably but don't have the time or knowledge to move forward, or if you're worried about who to trust, give us a call on 0208 123 2575 to see how we can help you with our independent and trusted network of suppliers and expert services.
